Virtually Anglo-Saxon: Old Media, New Media, and Early Medieval Studies in the Late Age of Print

By Martin K. Foys

University Press of Florida. Paperback. Book Condition: New. Paperback. 288 pages. Dimensions: 8.8in. x 6.0in. x 0.8in. Its not often that a scholar writes a book that puts her or his literary period on the map of literary studies . . . Particularly valuable because it tells us an immense amount about key texts and materials of Anglo-Saxon culture but because it also fills in a history entirely missing from recent work in New Media. -- Richard Burt, University of Florida Foys argues that early medieval culture did not favor the representational practices privileged by the modern age and that five hundred years of print culture have in effect shut off modern readers from interpretations of text and image that would have been transparent to a medieval audience. Examining print and post-print ways of reading medieval literature and art, he derives alternative models of understanding from the realm of digital media, considering pre-print expression through a range of post-print ideas and producing new and vital understandings of visionary Old English poetry, Anglo-Saxon maps of the world, 11th-century Benedictine devotional writings, medieval mathematical systems, stone sculpture of Viking settlers, and the famous Bayeux Tapestry. Building chapter upon chapter into a sustained discussion of New...
