They are the immune defense properties of plants and are so small in molecular size that they can quickly penetrate the tissues of the skin. Essential oils are lipid soluble and are capable of penetrating cell walls, even if they have hardened because of an oxygen deficiency. In fact, essential oils can affect every cell of the body within 20 minutes and are then metabolized like other nutrients. Essential oils contain oxygen molecules which help to transport nutrients to the starving human cells. Because a nutritional deficiency is an oxygen deficiency, disease begins when the cells lack oxygen for proper nutrient assimilation. By providing the needed oxygen, essential oils also work to stimulate the immune system. Essential oils are very powerful antioxidants. Antioxidants create an unfriendly environment for free radicals. They prevent all mutations, work as free radical scavengers, prevent fungus, and prevent oxidation in the cells. Essential oils are antibacterial, anti-cancerous, anti-fungal, anti-infectious, anti-microbial, anti- tumorial, anti-parasitic, anti-viral, and antiseptic. Essential oils have been shown to destroy all tested bacteria and viruses while simultaneously restoring balance to the body. Scroll Up and Order your Copy Today!.
