

Power, Heating and Ventilation Combined Power and Heating Plants, Vol. 3: A Treatise for Designing and Constructing Engineers, Architects and Students (Classic Reprint)

Filesize: 8.09 MB

Reviews

It is straightforward in go through easier to recognize. I actually have study and that i am sure that i will going to study yet again again down the road. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Jaclyn Johns DDS)

POWER, HEATING AND VENTILATION COMBINED POWER AND HEATING PLANTS, VOL. 3: A TREATISE FOR DESIGNING AND CONSTRUCTING ENGINEERS, ARCHITECTS AND STUDENTS (CLASSIC REPRINT)

DOWNLOAD

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Power, Heating and Ventilation Combined Power and Heating Plants, Vol. 3: A Treatise for Designing and Constructing Engineers, Architects and Students The subjects covered in the following chapters relate especially to the power and heating equipment for buildings of large size, such as office buildings, department stores, municipal buildings, hotels, hospitals and institutions, theatres, technical and trade schools, loft buildings, railroad stations, machine shops, foundries, paper and textile mills. The mechanical equipment in buildings of this kind is more or less complex, depending upon their size and use, and may provide for the generation of power, lighting, elevator service, refrigeration, pumping, fire protection, air compression, vacuum cleaning, drying, water heating, cooking, sterilizing, etc., not to mention the special machinery used in various manufacturing processes. In some cases only a few of these requirements may be necessary, while in others, like the modern office building or hotel, practically all of those noted are called for. It has been the aim in the present volume to treat the various problems somewhat broadly and with special reference to the steam requirements. Equipment relating to the generation and use of steam has been considered in some detail, while other matters, such as lighting, elevator service, refrigeration, etc., have only been touched upon as they relate to the steam side of the problem. It has been assumed that the reader is already familiar with the usual details of heating and ventilating design, hence, attention has only been given to the special requirements of the buildings under consideration. In the later chapters a study has been made of the relation between power and heating, and methods given for determining the results...
