This quantity of heat corresponds to over 10, 000.000 foot-pounds of work. Horse power being considered as corresponding to 550 foot-pounds per second or 33, 000 per minute and 1,980, 000 foot-pounds per hour, the pound of coal, it will be seen, contains an energy which, if capable of being completely converted into work without loss, would in one hour be equal to 5 horse power.
