Attack Warning: Norads Communications System Segment Replacement Program Should Be Reassessed: Imtec-89-1

By -

Bibliogov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 70 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO assessed the Air Force's acquisition strategy for replacing the Communications System Segment (CSS) of its North American Aerospace Defense Command (NORAD) Tactical Warning and Attack Assessment System, focusing on: (1) whether the Air Force should accept and install the block I semi-automated technical control unit as planned; (2) the extent to which CSS upgrades will satisfy requirements and extend the systems life; and (3) whether the Air Force should develop the block II automated message distribution capability, given the recent reductions in requirements, current system upgrades, and high development risks. GAO found that the Air Force: (1) has spent about 72 million on the block I unit for the CSS replacement; (2) Electronic Systems Division plans to accept the block I unit, although its critical design deficiencies in software, restart requirements, and wiring standard and equipment incompatibility preclude its installation and use at the Cheyenne Mountain Air Force Station, which houses the data processing and communications subsystems supporting NORAD; (3) plans to allow the contractor to correct identified deficiencies, at no additional cost to the...
