

Mathematical Questions and Solutions Volume 39

Filesize: 7.54 MB

Reviews

A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).

(Robyn Nolan)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1883 Excerpt: . by Dr. Curtis; E. Ruttee; and others. This, which is known as Alhazen s problem, admits of the following geometrical solution: --If C he the centre of the circle and a its radius, take E and F so that AC. CE = a = BC. CF; draw the hyperbola-locus of vertex of all triangles whose common base is EF, and the difference of whose base angles = Z CEF CFE; let H be any one of the four points in which this hyperbola cuts the circle; then, as ZEFH-FEH = CEF-CFE, we have Z CEH = CFH, and in the triangles ACH, HCE, we have AC: CH = CH: CE, therefore Z AHC = CEH; similarly Z BHC = CFH, and therefore Z AHC = BHC, and Z AHK = BHK, therefore H is one of the required points. 6924. (By Professor Seitz, M.A.)--A triangle is formed by joining three random points within a sphere; prove that the average area (1) of the triangle is $\frac{1}{2}\pi r^2$, and (2) of its inscribed circle is $(\frac{1}{2}\pi r^2 \log 2) \pi r^2$. 6917. (By J. L. Mokenzie, B.A.)--A straight line XY outs the tangents at two given poiuts A and B on a given circle in L and M respec TOL. XXXIX. H tively, and the circle itself in C and D; then (1) if the circles ABL, ABM cut XY in a and $\frac{1}{3}$ respectively, prove Ca = D/3; and (2) if the circles passing through L and lf, and touching...
